

Instructions: Find the missing length, x, leave it to two decimal places if needed.

★ BONUS TIME ★

①  $c^2 - a^2 = b^2$   
 $30^2 - 18^2 = b^2$   
 $= 24 \quad 900 - 324 = b^2$   
 $= \sqrt{576} = \sqrt{b^2}$   
 $24 = b \rightarrow z$

②  $a^2 + b^2 = c^2$   
 $45^2 + 24^2 = c^2$   
 $2025 + 576 = c^2$   
 $2601 = c^2$   
 $51 m = c$
